

Lambra VACUUM

We develop and maintain a complete new line of blood draw/infusion systems. Designed to meet every requirement of user safety, patient comfort and results.

Lambra KIT

Lambra has a range of *in vitro* products for the collection and transportation of urine, faeces, sputum and other biological samples. We offer an array of systems and devices with all the accessories required to obtain sterile samples automatically, quickly and safely.

Lambra CEL

Over 20 years' experience in the manufacture of premium quality cellulose for hospital use, with different measurements, grammages and packaging formats, all approved by leading Spanish hospitals.

Lambra TEST

We offer a wide range of diagnostic tests for a number of conditions, urinalysis and pregnancy, ovulation and multi-drug tests using nasopharyngeal swab, saliva swab, whole blood, serum/plasma and urine samples, among others.

GLUCOMEDICS

Complete range of glucose drinks manufactured in Spain by LAMBRA. Glucose solutions for oral use. The "GLUCOMEDICS" line is available in orange and lemon flavours and at different concentrations. Backed by a rigorous study to ensure a practical and pleasant-tasting premium product.

Lambra CODE

Lambra has over 20 years' experience in sample identification. We manufacture both blank and pre-printed custom labels in the format specified by the customer. We also stock printers, ribbons, wristbands and paper slips.

Lambra, specialists in clinical laboratory products.

Lambra

Medical supplies

Lambra is a Spanish company specialising in the sale of medical products and supplies since 1989, which has given us over 30 years' experience in refining and enhancing the quality of our products and services.

Having spent many years distributing hospital products for diagnosis, treatment and testing, we continue to expand and develop new proposals to ensure comprehensive systems for patient identification and monitoring.

Lambra Vacuum

Tube holder and puncture systems can be selected based on the safety needs and conditions required of patients and users.

All LAMBRA® solution tubes and mini tubes are available in different versions to cover a broad spectrum of applications, thereby meeting all requirements and systems in the daily procedures of a wide range of laboratories.

All components of LAMBRA® blood draw/infusion systems enhance patient comfort while contributing to the performance of a safe, quality procedure with reliable results.
